The American Petroleum Institute (API) has approximately 500 technical standards for processes and components. "Pumps - Shaft Sealing Systems for Centrifugal and Rotary Pumps" (API Standard 682) is the standard about end face mechanical seals. The purpose of API 682 is to assist in the selection and operation of end face mechanical seals in centrifugal pumps.

excessive stiffeners and 5/16" plate material, the API 12B tank failed miserably. Higher material grade steel (50, 60, 70 KSI) compounds the fabrication deficiency. The net result is a fabricated panel design that will not seal and will leak continuously in the future. This is when API 12B fabrication becomes your problem. Figure 1.1 Figure 2.1

API- 12F identifies in detail the size of each tank in diameter and height. Along with the dimensional sizes, API-12F identifies nozzle sizes and nozzle locations to ensure uniformity in the API-12F tank. The API-12F standard also eliminates many steps in the engineering process for the design of these tanks.
