Bendix King Kt 78 Transponder

The King KT 76 and KT 78 Transponders are radar beacon equipment designed to fulfill the role of the airborne beacon under the requirements of the Air Traffic Control Radar Beacon System (ATCRBS). The KT 76/78 Transponders are capable of locating the user through the air traffic controller.

KT 76/78 TRANSPONDER INSTALLATION MANUAL 006-0067-01

The KT-78A is a quality King transponder, and an update of the original KT-78. This transponder is has been solid and dependable, but it is really beginning to show its age. With 150 watts of transmission power, the KT-78A may operate up to 15,000 feet.

KT-78A Transponder - Bennett Avionics

The KT-78 family of transponders are King's lower power, lower priced models. With 150 watts of transmission power, the KT-78 may operate up to 15,000 feet. If you don't fly higher than that, and don't travel a great distance from ATC radar, this lower-powered transponder may be exactly what you need. The KT-78 features:

KT-78 Transponder - Bennett Avionics

The KT-78A is simply a low power version of the popular KT-76A transponder. The KT-78A peak power is 113 watts minimum while 200 watts for the KT-76A. The KT-78A was originally designed for low flying aircraft that operated in very local areas such as crop dusting (agriculture) applications.
