Introduced at the 1927 Olympia Show the Norton ES2 enjoyed a production run lasting over 30 years. It featured a full-cradle frame (as did the OHC CS1) and the vertical single-cylinder engine shared the same 79mm x 100mm engine dimensions first used by James Lansdowne Norton as early as 1911. On the ES2, the magneto was moved behind the cylinder. The ES2 designation was formed thus: E for extra cost, S for sports and 2 for the second version of the 79mm x 100mm long-stroke engine.
